English — PROFESSIONAL

Urdu — FLUENT

Pashto — NATIVE

PROFILE

Computer Science graduate focused on project coordination, web development, and visual design. I work with discipline, clear communication, and a practical approach to solving problems. I enjoy organizing work, collaborating with teams, and delivering results on time. Seeking an opportunity to apply academic knowledge, grow professionally, and contribute to meaningful projects.

Project Coordination | Web Development | Graphic Design | Teamwork

EXPERIENCE

University Events Management System
FINAL YEAR PROJECT

- Designed and developed a web-based system to manage university events, users, and records.
- Analyzed requirements, planned features, and documented the project from start to finish.
- Implemented database-driven functions, tested the system, and improved usability based on feedback.

Web Development Projects
ACADEMIC

- Built responsive websites using HTML, CSS, and JavaScript.
- Applied problem-solving skills to software tasks, database work, and user-focused features.
- Worked in teams to manage tasks, timelines, and project objectives.

Event Hosting & Coordination
UNIVERSITY ACTIVITIES

- Hosted and anchored university events, supporting audience engagement and smooth event flow.
- Strengthened public speaking, leadership, and coordination skills in live settings.
